

A Survey
of the
COAST OF NEWFOUNDLAND,
From
FOGO ISLAND to POINT PARTRIDGE.

By
Lieutenant Fred^k. Bullock; R.N. 1823.

East of Toulinguet I. Surveyed by Staff Commander J. H. Kerr, R.N. 1871.

er. corall.m. mud, r. rock.s. sand, sh. shells, st. stones.

Magnetic variation in 1871; nearly stationary.

SOUNDINGS IN FATHOMS

Fig. No. 4. A view
of a few small islands and headlands
nearly opposite English population. The River is
the most rapid current in the Bay of Bonavista.
The 1st rapid begins at the mouth of the River
and continues for about 10 miles, where it becomes
more rapid, and at 8 miles has an interval of
about 1 mile, where the water is very shallow,
and the tide runs back and forth, after striking obliquely
against the rocks, and requires great caution in passing.

Longitude West 55° of Greenwich

London Published according to Act of Parliament at the Hydrographic Office of the Admiralty 24th Sept. 1828. Correction March 73.
Sole Agents J. D. Dutton Agent for the Admiralty, G. P. Peacock & H. King Esq. Printer.
